- GS07 Pillow Switch

## 3.5MM JACK

Mono universal jack  
connection for easy  
connection

## HIGH COMPATIBILITY

Perfect match for GlassOuse V1.2 and other  
adapted devices and systems using switch access

## GLASSOUSE ASSISTIVE DEVICE & G-SWITCH SERIES HAVE NEW ADAPTED SWITCH CONTROLS

GlassOuse Assistive Device introduces the new switches under G-Switch Series family for GlassOuse V1.2 and other adapted devices for disabled people who have limited mobility.

### PILLOW SWITCH

REMOVABLE SOFT CUSHION

Known as a game-changer device in assistive technology industry, GlassOuse Assistive Device adds a new member to G-Switch Series and expands its compatibility with three adapted switch options. As separate switch controls, newly launched Press Switch 100gr, Press Switch 150gr and Pillow Switch are fully compatible with the latest GlassOuse generation, V1.2 and also other adapted devices and systems using switch access.

All three switches come with a universal 3.5mm mono jack plug-in like their sister items Bite Switch, Puff Switch, Finger Switch and Foot Switch. The wired switches have 185mm long cable and a 8.63cm activation surface, making the items comfortable enough for both user groups needing either a large or small target area to interact with less physical control. Also, all items provide an auditory click and tactile feedback to inform the user that the switch has been pressed.

### PRESS SWITCH 150GR

8.63CM ACTIVATION SURFACE

GS05 Press Switch 100gr has a 100gr activation force while GS06 Press Switch 150gr and GS07 Pillow Switch have 150gr. Made from durable materials, the switches can be used with different mounting systems, tiny screws or double-sided tapes. Likewise, Pillow Switch enables the users to use touch fastener straps or safety pins to secure the item on fabric surfaces.

### PRESS SWITCH 100GR

COMPACT & DURABLE DESIGN

As published previously, GlassOuse team will launch more switch options for G-Switch Series family in the future to make GlassOuse more compatible for different user groups while aiming to offer reliable adapted switch control alternatives to other assistive device and systems.

Press Switch 100gr, Press Switch 150gr and Pillow Switch are available for pre-order on [glassouse.com](http://glassouse.com) between 15-30 April, 2019.
